

PRINTIC V2.0 TICKETING SOFTWARE

Print your own raffle tickets, vouchers, promos and more!

QUICK START GUIDE

USING PRINTIC DATA FIELDS

The **Printic Data Field** is the core functionality of Printic Ticketing software. This is where you generate numbering for raffle tickets, combinations for sports and racing promotion fields, random number generation and more.

USING PRINTIC DATA FIELDS

1. Every promotion must contain at least one **Printic Data Field** (usually a number for tickets) before creating a PDF or being printed.

To insert a data field, first create a text box using the **T** tool, then click inside the text box and select the **Printic Data Field** tool:

2. You will now see the **Printic Data Field** window:

3. NUMBERING

Consecutive numbering is the default selection, and you can change a number of settings and preview the output in the **Preview** pane below the settings.

Random numbering setup is the same, but the output will be randomised on each ticket.

4. STRIP RAFFLE NUMBERING

If you are creating a **Strip Raffle** ticket, where you need several numbers on the same ticket, make sure the **Linked** checkbox on the top right is ticked (this option is not visible on other promotion types).

Select **OK** then simply copy and paste the text box as many times as you need. You can always **Preview** the sheet to make sure the numbers are in the correct order.

Strip Raffle Numbering Example: If you select 500 tickets in the **Promotion** section and then place 5 number boxes on one ticket, you will produce numbering from 1 to 2500 (5 numbers x 500 tickets), and so on.

We are hoping to make this numbering system for Strip Raffles easier to understand in a future update to the software.

5. SPORTS PROMOTIONS

When a sports promotion is selected, you will now be able to set the name for each team - and how many players are in each team - in the **Promotion** section.

DOUBLES

Once both team names are set, you can insert a **Printic Data Field** and select **Team 1**, click **OK** and then repeat for **Team 2**.

You can place both names in the same text box, but it is recommended to place each team on a separate line.

INSERT PRINTIC DATA FIELD

6. RACING PROMOTIONS

Racing sweeps are the most common racing promotion, and for this you only need to insert a data field for **Horse 1** (winner).

For **Quinella/Exacta** and **Trifecta/Boxed Trifecta** you will need to set 2 or 3 Horses respectively.

You can place multiple horses in the same text box, but it is recommended to place each one on a separate line.
